

Coordinated Seniors Care Initiative

Expression of Interest

The Shared Care Committee is inviting EOIs from physician groups wanting to engage GPs, Specialists, GPs with Focused Practice, and other health professionals, in innovative and effective ways to coordinate care for older adults with complex medical conditions and frailty. Chronic co-morbid conditions to be addressed include a combination of arthritis, COPD, cardiac, dementia, and diabetes.

Patient Experience

Please provide a brief description of a patient experience that illustrates the challenges faced by adults with multiple complex medical conditions in receiving care in your community.

Proposed Community Activities

Provide a detailed description of the activities that will be undertaken and how the proposed activities are expected to lead to better outcomes. Please answer the following questions as part of your response.

- What is the challenge or gap for patients?
- What activities will the community undertake to address the challenge or gap?
- What products or process will be developed?
- What is the anticipated improved outcome for patients and how will this be measured?
- How will these improvements be sustained?

| Which combination of medical conditions would your proposed project target? | | | | | | |
|---|-----------------|-------------------|-------------------|-----------------|-----------------|-------------|
